ADDITIONAL TESTIMONIALS

IN FAVOUR OF

DR. J. H. TEACHER

Digitized by the Internet Archive in 2016

From Robert Muir, M.A., M.D., F.R.S., Professor of Pathology in the University of Glasgow; Pathologist to the Western Infirmary, Glasgow.

September 1, 1911.

I HAVE great pleasure in stating that in my opinion DR. J. H. TEACHER is highly qualified for the new St. Mungo (Notman) Chair of Pathology. His training in Pathology and Bacteriology has been of an extensive character, and he has spared no pains to make himself thoroughly proficient in every department. As pathologist to the Western, and afterwards to the Royal, Infirmary, he has had a long and valuable training in the pathological work of a large hospital—in the conducting of post-mortem examinations, in the preparation of museum specimens, and in reporting for the physicians and surgeons on pathological material of all kinds; his work has been characterised throughout by ability and trustworthiness. The new pathological institute at the Royal Infirmary has been planned and constructed under his supervision, and I consider that his share of the work has been most efficiently done. He has also proved himself an able investigator; his most important work has been in connection with chorion-epithelioma and gynaecological pathology, and his published papers have justly made him an acknowledged authority; I may say that there is no one whose opinion on these matters I value more highly. He is a master of Pathological Histology, and as University Lecturer on this subject he proved himself a very successful and attractive teacher.

I believe that if he were appointed to the Chair he would perform its duties with distinction and success, and would devote himself in an unselfish and whole-hearted manner to the development of the pathological department at the Royal Infirmary.

ROBERT MUIR.

From Howard A. Kelly, Professor of Gynaecological Surgery, Johns Hopkins University, Baltimore, Maryland, U.S.A.

Indian Point,

Magnetawan,

Ontario, Canada, August 17, 1911.

It is no little pleasure to testify, as an American teacher with twenty-three years experience, that Mr. John H. Teacher is one of the distinguished group of men engaged in original and scientific research work in Great Britain widely and most favourably known and honoured throughout the North American Continent. There exists, I think, only a little handful of these men on this side of the water, corresponding to a similar small group in Great Britain, laboring to maintain the credit of the Anglo-Saxon race for original scientific work. To this group, without a shadow of a doubt, by his eminent researches in pathology Mr. Teacher belongs.

I recall with pleasure the way in which I was urged to go to see him and his work, both for instruction and inspiration, when I made a tour through England and Scotland last year.

I sincerely trust, in common with many earnest colleagues in America, that Mr. Teacher will be afforded the larger opportunities of continuing his work and extending his reputation which he will find in the New Chair at the Royal Infirmary in the University of Glasgow.

Respectfully,

HOWARD A. KELLY.

From R. F. C. Leith, M.A., B.Sc., M.Sc., Professor of Pathology and Bacteriology in the University of Birmingham.

THE LINGA,
GULLANE, 26th August, 1911.

I HAVE much pleasure in supporting Dr. John H. Teacher's application for the St. Mungo (Notman) Chair of Pathology at the Royal Infirmary, Glasgow.

Dr. Teacher's name is widely known by his writings, particularly those upon the subject of chorion-epithelioma, upon which he is a leading authority. His work in Glasgow in the domain of Pathology is so well-known that it is unnecessary for me to enlarge upon it. His experience in all the divisions of pathological work which come under the duties of a Professorial Chair is great. His publications show that he possesses powers of analysis, criticism and research of a high order, coupled with a wide knowledge of the literature of his subject.

He is in my opinion well qualified to fulfil the duties of the Chair of Pathology for which he is an applicant with credit and satisfaction, and I cordially wish him success.

R. F. C. LEITH.
